

RUSK COUNTY TIRE RECYCLING

The Tire Recycling program provides an opportunity for Rusk County residents to dispose of their discarded tires for a low fee at convenient collection sites. This program provides an outlet for waste tires and assembles large amounts of waste tires sufficient to be loaded on semi-trailers and transported to facilities where the tires are converted to tire derived fuel (TDF) and made into a high quality crumb rubber that is used in horse arenas, playgrounds and landscaping.

It is estimated that in Wisconsin five million used tires are discarded each year. Waste tires present a health hazard and are fertile breeding grounds for mosquitoes and other insects. Large stockpiles of waste tires pose a fire hazard.
