TIMBER SALE PROSPECTUS  
TRACT # 24-16  
Section 17, 18, 19, 20 T 36 N-R 8 W

<u>Species</u>	<u>Estimated Volume</u>	<u>Mininum Bid</u>	<u>My Bid By Species</u>	<u>Total</u>
Mixed Hardwood	50 MBF	\$50.00/MBF	\$ _____/MBF	\$ _____
Red Oak	10 MBF	\$100.00/MBF	\$ _____/MBF	\$ _____
Aspen	75 cds	\$15.00/cd	\$ _____/cd	\$ _____
Mixed Hardwood	200 cds	\$10.00/cd	\$ _____/cd	\$ _____
TOTAL BID VALUE				\$ _____

Harvesting Prescription

Aspen Clearcut/Salvage Area - Harvest all aspen, white birch, and northern hardwood within the designated timber sale area which is 5" or greater in diameter at D.B.H. Utilize all trees that will make one or more 100" pulp sticks to a 4" top D.I.B. All undamaged conifer, oak, cherry tree species, and hawthorne should be left uncut and undamaged to add diversity to the regenerated stand. All slash must be lopped and scattered. All other residual non-merchantable hardwood tree species must be cut concurrently with the removal of all merchantable wood products.

Hardwood Salvage Area - Salvage all trees within the designated timber sale area which have been damaged due to excessive wind.

Seasonal Restrictions for Oak Wilt

Oak Wilt has been confirmed to be present within Rusk County. Because this timber sale contains a significant oak component which will be retained post-harvest, no harvesting will be allowed from April 15<sup>th</sup> to July 15<sup>th</sup> in accordance with Rusk County's Oak Wilt Restrictions.

Integrated Resource Considerations

Due to the fact that this is a wind damage salvage sale, this sale must be completed by October 31, 2017. Part of this salvage sale is in a selectively managed timber type, therefore there will be a residual stand of evenly spaced, high quality northern hardwood and oak tree species to reduce the visual impact of this timber sale. All existing and future logging roads must be kept free of slash and logging debris. Any new forest road location or construction is subject to review and approval by the County Forest Administrator. All designated snowmobile trails used by the contractor during the harvesting operation must be kept open, free of slash and logging debris, and snow covered. All slash must be removed from adjacent private land ownership, and any slash or logging debris accumulated on the landings must be lopped and scattered. Equipment operation within any established Riparian Management Zone (RMZ), as indicated on the timber sale map, is prohibited. Depositing slash and/or logging debris in any wetland or RMZ is also prohibited. Decking of cut forest products will not be permitted on any town road right-of-way, unless prior approval by the town chairman has been granted. Care should be taken during the harvesting operation to minimize any detrimental effects to the soils. Before the timber sale is closed, all forest skid trails and logging roads used in the harvesting operation must be leveled.

TO: Rusk County Land and Forestry Committee

I hereby make application to purchase the above timber stumpage at the prices listed under ("My Bid By Species").
