

DATE: May 17, 2017

TO: Municipalities, businesses and property owners impacted by the May 16, 2017, tornado and storm event in Polk, Barron and Rusk Counties. Other counties may have been impacted. The same information applies to those areas.

FROM: Bob Germer, Waste Management Specialist, 715-635-4060, [robert.germer@wisconsin.gov](mailto:robert.germer@wisconsin.gov)

SUBJECT: Disposal of solid waste generated from this storm event

Solid waste resulting from this event may include building demolition waste, household waste, tree and vegetation waste, waste asphalt, waste concrete, metal waste (culverts, bridge components, etc.), treated wood, plastic culverts, dead livestock, and other types of solid waste.

- Waste asphalt pavement, all types of waste concrete, clean, untreated and unpainted wood and all metal waste should be recycled if possible.
- The waste listed above may be temporarily stored in areas that are not in a floodplain, nor in any areas where a significant adverse impact on wetlands could occur, where a take of an endangered or threatened species could occur, where a detrimental effect on any surface water could occur, where a detrimental effect on groundwater quality could occur, or in any area where explosive gases could concentrate or where hazardous air contaminants could be released.
- If not recycled, clean soil (including emptied sand bags or sandbags made of degradable material); brick; building stone; asphalt pavement; concrete; reinforced concrete; and clean, untreated wood not painted with lead based paint, may be disposed on site if the location does not have an impact on any of the criteria listed in the bullet above. The disposal site should be covered with a minimum of two feet of fine-grained soil and six inches of top soil which is seeded, fertilized and mulched to stabilize. The disposal site shall be operated in a nuisance-free and aesthetic manner.
- Treated wood (treated with preservatives, glues or lead-based paint) must be disposed in a municipal solid waste landfill, construction and demolition waste landfill, waste to energy facility, or through a solid waste transfer facility.
- Clean wood (wood that is not painted, treated, or any type of manufactured wood product such as plywood, chipboard and OSB (oriented strand board)) can be managed following the information in this document: <http://dnr.wi.gov/topic/forestfire/documents/woodwastedisposal.pdf>.
- Management options for dead livestock can be found at this link: [https://datcp.wi.gov/Pages/Programs\\_Services/CarcassDisposal.aspx](https://datcp.wi.gov/Pages/Programs_Services/CarcassDisposal.aspx).
- Attached is a storm waste management options checklist to assist in determining how to manage waste and, for reference, listings for woodburning facilities, solid waste transfer facilities, municipal solid waste landfills and construction and demolition waste landfills that may be able to accept and manage solid waste for you.

If you have questions on managing solid waste resulting from this storm event, please contact:

Bob Germer, at 715-635-4060, or by email at: [Robert.germer@wisconsin.gov](mailto:Robert.germer@wisconsin.gov) or  
Casey Lamensky, at 608-267-7574, or by email at: [Casey.lamensky@wisconsin.gov](mailto:Casey.lamensky@wisconsin.gov).
